

The Benefits of
Online MSDS Management

The Benefits of Using an
Online MSDS Management System

- Compliance
- Flexibility
- Organization
- Remote Access

Compliance

OSHA Standard 1910.1200(a)

"Material Safety Data Sheets"

*The employer shall maintain in the workplace copies of the required material safety data sheets for each hazardous chemical, and shall ensure that they are readily accessible during each work shift to employees when they are **in their work area(s)**.*

Compliance

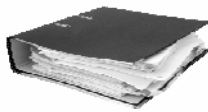

Does an electronic version meet the OSHA Compliance Standards?

Electronic access, microfiche, and other alternatives to maintaining paper copies of the material safety data sheets are permitted as long as no barriers to immediate employee access in each workplace are created by such options.

Flexibility

Virtual binders can be printed and made into physical binders for work areas that do not have access to a computer, such as a custodial closet or the cafeteria.

Having the option of virtual and physical binders ensures that you will have an MSDS for each hazardous chemical in every work area.

Remote Access

Having remote access to your chemical inventory creates an added safety net in case of emergencies.

SchoolMSDS can be accessed by any computer with internet connection – including smart phones and PDA's!

The Added Benefits of Using SchoolMSDS

- School Focused
- Organization
- Unlimited Administrator Access
- Document Hosting Capabilities
- Online MSDS Tutorial

School Focused

SchoolMSDS is the only MSDS management system designed around the unique needs of schools districts.

Include information to help responders in the event of an emergency situation.

- Room Numbers
- Room Names
- School Map
- Contact Information

Our MSDS repository includes chemicals that are commonly found in school districts.

Organization

A "Facility Tree" organizes your chemicals and binders by work area, which is mandated by OSHA standards. One binder per building is not good enough!

You can also electronically store your outdated MSDSs so they are always in your database.

Administrator Access

Varied levels of administrator access means you can give permissions for specific folders and/or binders

Administrator Options allows users with administrator rights to modify all aspects of your SchoolMSDS custom site.

No extra charge for having multiple administrators

Document Hosting Capabilities

Upload and store all your safety related policy documents in one centralized location for easy access to important information.

MSDS Tutorial

Free Access to the SafeSchools MSDS Tutorial

Tutorial includes interactive scenarios and an assessment

Save Time

A better system will ultimately lead to saving time, and having virtual MSDS binders allows you to manage your entire chemical inventory with just a few clicks of a button.

An investment in SchoolMSDS will add value to the technology that your district has already purchased.

Save Lives

"Remote access to our Material Safety Data Sheets helped us save the life of a student who had ingested ethylene glycol."

- Kelly Breeding, Director of EHS
Fayette County Schools
